#### Features

### Standard

#### HD2-Filter

The HD2 air filter made of polyethylene has significantly finer pores than foam filters, this filters even the finest dust. In addition, the new HD2 filter can be cleaned easily. This means that the filter will last longer over the entire service life of the machine under normal conditions.

#### STIHL 2-MIX Engine

The 2-MIX engine features an advanced stratified charge system that boosts power, whilst reducing consumption and pollution, significantly lowering unburned hydrocarbons in the exhaust. The result is a cleaner, more fuel efficient engine.

#### STIHL Anti-vibration system

Reduces vibration to a minimum, thus guaranteeing work comfort when using for longer periods.

#### STIHL Easy2Start

Easy starting with less effort due to an additional spring between the crankshaft and the rope rotor. A smooth pull on the starter rope tensions the spring against the compression resistance of the engine. The jerks are not transmitted to the rope. The spring automatically transmits the stored energy to the crankshaft, causing it to turn and ensuring reliable starting of the engine.

#### Throttle lock with built in stop switch

The running machine switches off reliably after a brief press of a button. Once the machine is at a standstill, the ignition activates again automatically. Thus the ignition is always ready for starting.

#### One handle control with soft grip area

For secure and comfortable grip. With integrated anti-static system.

#### Manual fuel pump (Purger)

A small fuel pump delivers fuel to the carburettor at the touch of a button. This reduces the number of starting strokes required from a cold start.
